## Strengthening Our Analytical Business to Solve Social Issues with Our Core Technologies

Tokyo, March 31, 2025 – Hitachi High-Tech Corporation ("Hitachi High-Tech") is strengthening its analytical business through integrating and jointly operating its Hitachi High-Tech Analytical Science Ltd. ("Hitachi High-Tech Analytical Science") and Hitachi High-Tech Science Corporation ("Hitachi High-Tech Science") businesses.

As of April 1, 2025, Hitachi High-Tech Science will become Hitachi High-Tech Analysis Corporation as part of this re-structure.

By integrating the core technologies of both companies, we will be better equipped to address the increasingly complex processes involved in developing, manufacturing, and inspecting materials that our customers encounter. Bringing together X-ray fluorescence (XRF), optical emission spectroscopy (OES), laser induced breakdown spectroscopy (LIBS), thermal analysis (TA), liquid chromatography and spectrophotometers from Hitachi High-Tech Analytical Science and Hitachi High-Tech Science will facilitate the development of new, innovative solutions.

Initiatives to create a safe and secure society, and reducing environmental impact are becoming increasingly important across a wide range of business fields including healthcare, semiconductors and electronic components, and batteries. The analytical division and beam technology division, which includes electron microscopes, are key to supporting Hitachi High-
